

Sibghatullah Khan

Software Engineer | ssibghatkkhan81@gmail.com | +91 9748598179 | India

PROFILE SUMMARY

Software Engineer with 4 years of experience building scalable web applications, real-time systems, and data-intensive platforms. Experienced in React, TypeScript, Electron, SSE, WebSockets, visualization, and configuration-driven architectures.

EXPERIENCE

SOFTWARE ENGINEER | Digantara

Aug 2025 -- Present

- Built core modules for **STARS**, a satellite data platform handling complex workflows and large-scale orbital datasets.
- Designed a **configuration-driven stepper** for dynamic module creation, enabling scalable and reusable workflows.
- Developed **Maneuver and RFI modules end-to-end**, including architecture, reusable UI, APIs, state management, validation, and workflows.
- Built **dynamic ECharts dashboards** to visualize complex satellite data and improve user experience.
- Developed a robust **SSE-based notification system** for reliable real-time server-to-client event delivery.
- Built an **Electron application** as a web wrapper and optimized cache management, achieving up to **90% faster performance** and **50% lower GPU usage**.
- Developed **2D/3D map dashboards and PDF exports**, reducing manual reporting effort by **40%**.
- Delivered the **Point Blindspot module in 1 week** using reusable and scalable UI workflows.
- Designed **Gantt charts, tracking tables, and dashboards**, reducing user interaction time by approximately **35%**.
- Resolved critical **3D rendering/navigation issues**, reducing recurring frontend defects by approximately **50%**.
- Built scalable APIs and **CSV/TLE ingestion workflows** for thousands of records, improving processing performance by approximately **25-60%**.

SOFTWARE ENGINEER | JDoodle

Mar 2024 -- Aug 2025

- Built a **bulk upload system** for onboarding thousands of users at once.
- Optimized SEO using **SSG and dynamic sitemaps**, increasing website traffic by approximately **40%**.
- Developed a **real-time collaborative IDE** with project sharing and forking, supporting thousands of concurrent users.
- Implemented **one-click deployment**, enabling developers to access projects approximately **10x faster**.
- Optimized preview performance using **WebSockets**, reducing loading time by approximately **50%**.
- Integrated **OTP authentication** for secure login and registration serving thousands of users.

ASSOCIATE SOFTWARE ENGINEER | Akrity Computing

2022 -- 2024

- Built scalable applications using **React, TypeScript, Node.js, and MongoDB**.
- Developed the V2 product with **reusable UI components and Storybook**, improving development speed and design consistency.
- Integrated **Highcharts** for advanced data visualization, improving user interaction by approximately **30%**.
- Built scalable features and APIs, including a **configuration-driven DataGrid**, improving reusability, data management, and performance.

PROJECTS

CODE ZAP | GITHUB

CAREER PATH | GITHUB

EDUCATION

RCC INSTITUTE OF INFORMATION TECHNOLOGY

B.Tech IT, 2022

GPA: 8.49

SKILLS

LANGUAGES

JavaScript • TypeScript • C++

FRONTEND

React • Vue • Redux • Tailwind

DESKTOP

Electron

BACKEND

Node.js • REST APIs • Express • NestJS

DATABASE

MongoDB • Firebase • PostgreSQL

TOOLS

Git • Jira • Figma • Storybook
